

Nikhil Dasar

+91 6268885174 | nkdasar@gmail.com | nikhildasar.vercel.app/ | github.com/kakashihatakes6 | linkedin.com/in/nikhildasar/

Summary

Dynamic full stack developer skilled in Go, AWS, Docker, Typescript, Next.js, React.js and Node.js with expertise in managing cookies for session persistence and user authentication. Proven ability to architect scalable backend systems and optimize performance. Proficient in Utilizing Redux, ShadCn, React-Query and Material UI.

Experience

Gpu.net, Full Stack Developer | Squareworks, Bengaluru

May 2025 - Present

- **Subnet Platform:** Contributed to the development of GPU.net's Subnet Platform for AI-focused decentralized GPU sharing. Built intuitive frontend dashboards and implemented APIs to manage subnet creation, GPU staking, and performance tracking.
- **AI Powered Gamerx Platform:** Developed a full-stack platform using Node.js, Express, PostgreSQL, and Sequelize. Designed backend APIs to manage gaming quests, course progress, and user data. Leveraged AI-driven logic to personalize content and enhance user engagement through performance-based recommendations.
- **CI/CD Pipelines:** Built deployment pipelines with Jenkins and GitHub Actions for Gamerx. Automated build, test, and release workflows, improving reliability and reducing manual effort.
- **AWS Infrastructure:** Deployed Gamerx on AWS using EC2 Auto Scaling and ELB. Configured scaling policies for traffic spikes, optimized costs during low usage, and monitored performance with CloudWatch.

QpiAI, Full Stack Developer | Karle Town, Bengaluru

Jul 2024 - May 2025

- **Quantum Cloud Platform:** Engineered key modules for QpiAI's quantum cloud platform by integrating the Quantum-SDK and building a visual Quantum Circuit Builder, **improving developer productivity and simulation performance by 10%** while enabling faster circuit design, optimization, and execution workflows.
- **Course-Selling Platform:** Architected a scalable backend using **Node.js, Express, PostgreSQL, and Sequelize**, optimizing database queries to **increase query speed by 30%**, enhance reliability, and reduce API response latency to **~40ms** under concurrent usage.
- **Ticketing System:** Designed and deployed a high-availability ticketing system with automated email notifications via Nodemailer, **improving issue resolution efficiency by 25%** and strengthening system reliability and user communication workflows.

Freelancer, East Homes | Remote

March 2023 - June 2024

- Optimized the performance of live projects using **lazy loading**, compressing images and minimized no. of HTTP requests.
- Developed projects using **Material UI, Prisma** and **Next JS** for UI Enhancement algorithms, to create the shortest process of sub-mitting a form during emergencies.

Skills

Front End	ReactJS, NextJS, Redux, Material UI, TypeScript, Shadcn, JavaScript, Tailwind CSS, HTML, CSS
Backend Database	NodeJs, Go, Express, JWT, Prisma, Postgres, MongoDB, GraphQL, SQL
Version Control DevOps	Docker, AWS, S3, AWS EC2, Heroku, Netlify, Vercel, Git, Github, Bash Scripting
Certifications	EICT - IIT Kanpur, Training - (2021) IIIT - Naya Raipur, Training - (2020) InternShala - (2023)

Projects

Shop-Vista | E-Commerce | Front End and Back End Development

Feb 2023 - April 2023

TechStack - NextJS, ReactJS, Express, TypeScript, MongoDB, Redux, Tailwind CSS, NodeJS

WEBSITE | GITHUB

- Developed custom authentication environment utilizing **Nodemailer** and **JWT**, integration with NodeJS.
- Frontend development using NextJS, ReactJS and Tailwind CSS for creating responsive, interactive and Intuitive UI.
- Payment Integration using **Razorpay** Gateway with **pre and post transaction API** integration for secure and robust transaction.
- Backend Implementation Using Node.js and Express.js to create API and database Integration.

Forgeable-AI-Coder | Autonomous AI Code Generation Assistant

Nov 2025 - Dec 2025

TechStack - Langchain, Langgraph, Python, Groq

WEBSITE | GITHUB

- Built a prompt-to-code system generating full-stack, ready-to-run applications, reducing development effort by **~60%**.
- Designed an end-to-end pipeline for scaffolding, logic generation, and environment setup, improving speed by **50%**.
- Automated local deployment environments, minimizing setup time and boosting developer productivity by **40%**.
- Improved code quality and maintainability, enabling **2x faster MVP** delivery through best-practice structuring.

NodeJS-AWS-CI-CD | Automated Deployment Pipeline (DevOps + Backend)

Aug 2024 - Sep 2024

TechStack - Node.js, AWS EC2, Docker, Docker Compose, GitHub Actions, SSH

WEBSITE | GITHUB

- Developed a **fully automated CI/CD pipeline** using **GitHub Actions** to deploy a Node.js server to **AWS EC2** with **zero-downtime updates**.
- Used **Docker & Compose** for consistent, containerized environments.
- Secured deployments via **SSH and GitHub Secrets** for safe automation.

Achievements

2023 **Research Paper**, Published a research paper on android mobile application 'Pay Per Parking'

India

2017-18 **2 Times Jee Mains Qualified**, Competitive Joint Entrance Examination 2017-18

India

Achievements: Finalists @ HackerRank Competition | Finalists in IT Dept. - Bachelor's Capstone Project | IEEE (Submitted)

Education

*10 **BTech in Information Technology Engineering**, Government Engineering College, Bilaspur | Bilaspur, India

*10 **Higher Secondary**, G.H.S. School, Bijapur | Bijapur, India

*10 **High School**, G.H.S. School, Madded | Madded, India
